The Illawarra Family Medical Centre engaged Event Project Management as its development and project managers associated with a flagship multistorey medical centre development in Wollongong. This started with the search and selection of the site, managing the authority approval and design process, and tendering and managing the building contractors.

The project was extremely challenging in many ways, none the least of which was the Council approval process. Event rose to the challenge in every situation and the project achieved all of the outcomes that we were looking for.

I commend Event Project Management for their tireless effort and determination in making the project a success. We particularly appreciated the genuine interest that their staff showed in every detail of the project.

We hope we have the opportunity to call upon the services of Event Project Management at some stage in the future and we would have no hesitation in recommending Event Project Management to other prospective clients.

Dr Jenny Smiley
Principle Practitioner
