

To whom it may concern,

Variety – the Children’s Charity NSW/ACT is a non-profit organisation founded in Australia in 1975. We believe all Aussie kids deserve a fair go and support kids living with disabilities, chronic illness, social isolation or financial hardship by delivering grants, services, programs, scholarships and events.

As with any charity, Variety strives to focus our limited resources where it will obtain the greatest impact for Aussie kids. For this reason, when we were faced with the need to upgrade our Sydney offices, we turned to organisations who we knew are aligned with our values. Through a previous relationship, EPM Projects was asked to find the most efficient and economical way in which to obtain our statutory development and building approvals. Their significant expertise has saved Variety significant cost, time and effort in obtaining the necessary development approvals for the upgrade of our offices.

It is without hesitation that I commend EPM to any prospective client - their knowledge and understanding of the Environmental Planning process and their expertise in project planning and management is superior. We are very grateful to their support and the outcomes they have achieved for us.

I would be more than happy to be contacted to discuss EPM further.

Yours sincerely

David Sexton
Chief Executive Officer
